

PHP

COMP1006 Introduction to Web Prog with PHP Assignment#3 – CRUD Essentials#1

Group 1: Marcella Ferreira, Rosana Andrade, Caroline Hoffmann

Folder Structure:

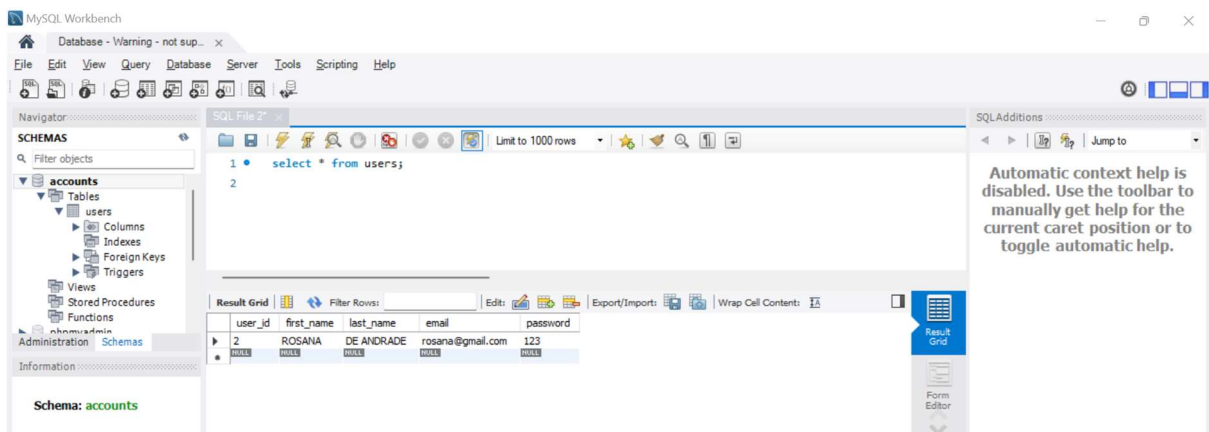

Database Connection (dbconfig.php): This file is essential for setting up the connection to our MySQL database. It defines the parameters such as the host, database name, user, and password.

```

1 <?php
2 $host='localhost';
3 $dbname = 'accounts';
4 $user='root';// The default username
5 $password='';// Empty by default => in your computer
6
7 $dsn = "mysql:host=$host;dbname=$dbname;port=3307";
8
9
10 try{
11     $pdo=new PDO($dsn,$user,$password);
12 }catch(PDOException $e){
13     echo "Database Connection failed: ".$e->getMessage();
14     throw new PDOException($e->getMessage());
15 }
16
17

```

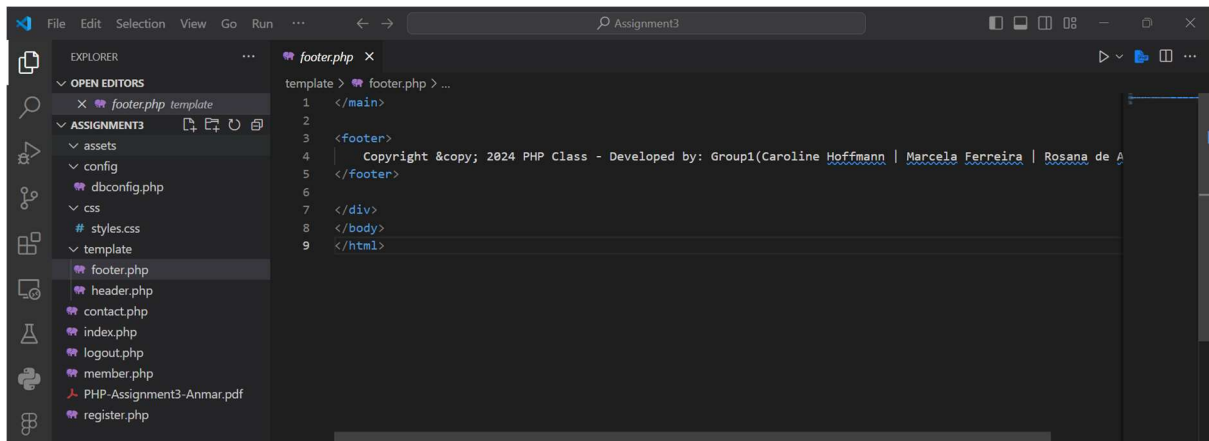

Header (header.php): This file is designed to ensure consistent header information across all pages of the website.

```

1 <?php session_start(); ?>
2
3 <!DOCTYPE html>
4 <html lang="en">
5 <head>
6     <meta charset="UTF-8">
7     <meta name="viewport" content="width=device-width, initial-scale=1.0">
8     <title>Home</title>
9     <link href="css/styles.css" rel="stylesheet">
10 </head>
11 <body>
12     <div id="container">
13         <header id="banner">
14             <h1>Final Assignment</h1>
15             <h3>Users' Info Using PHP with MySQL</h3>
16         </header>
17         <nav>
18             <ul>
19                 <li><a href="index.php">Home</a></li> <!-- Public Page-->

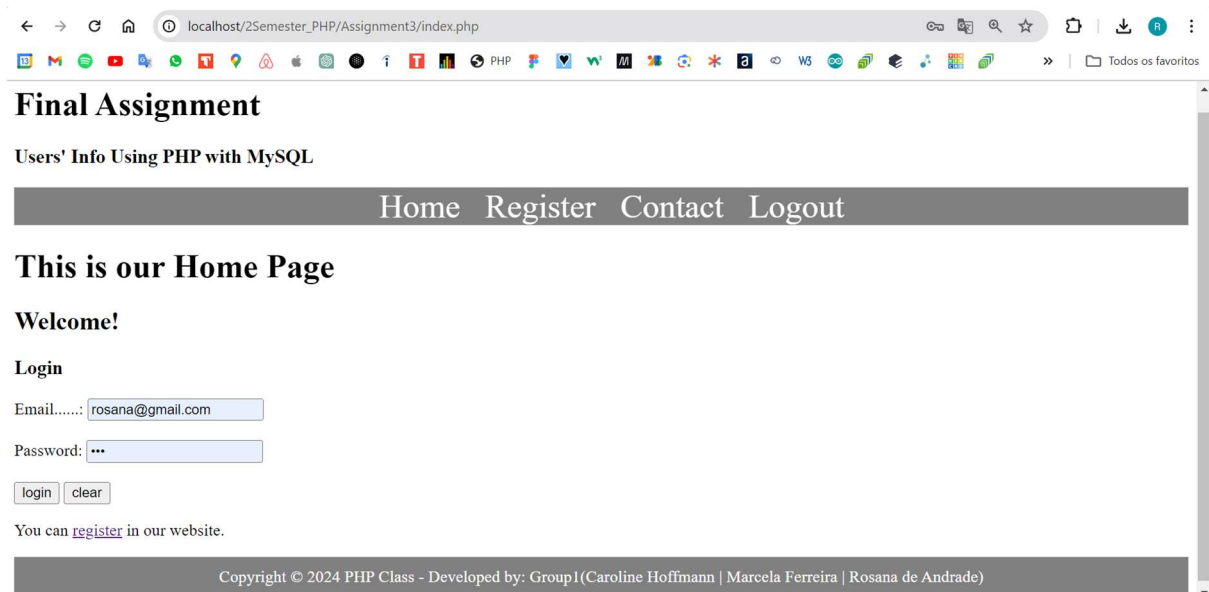

```

Footer (footer.php): This file is designed to ensure consistent footer information across all pages of the website.

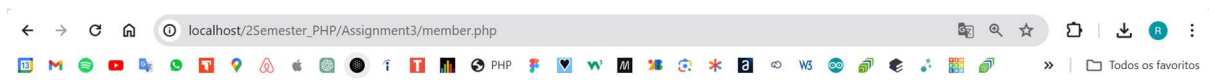

```
1 </main>
2
3 <footer>
4   Copyright &copy; 2024 PHP Class - Developed by: Group1(Caroline Hoffmann | Marcela Ferreira | Rosana de A
5 </footer>
6
7 </div>
8 </body>
9 </html>
```

Home Page (index.php): This is our application's landing page. It likely includes a login form where users can enter their email and password. The page also provides navigation to other sections like registration, contact, and logout.

Member page(member.php): this page is designed just when the users already have a login and password.

Logout (logout.php): This feature allows users to securely log out of the website.

```
1 <!-- just the logout code -->
2 <?php
3
4 session_start();
5 session_destroy();
6 header("Location: index.php");
7 exit();
8
9 ?>
10
```
